SATO Akira, Counselor, Japan International Science and Technology Exchange Center

Opportunities for Researchers from Overseas to Conduct Researches in Japan

Because the data were collected during October, 2008 and September, 2009, the content might be changed. It should be necessary to confirm the detail on URL before the application.

Invitation programs of universities and/or research institutions in which officials of these organizations only can invite overseas researchers to their own organizations were excluded.

Researchers in these data are researchers from graduate students in doctoral course, postdoctoral fellows, to eminent scientists.

By way of parenthesis in this connection, JASSO (Japan Student Service Organization) publishes excellent pamphlets of “Scholarships for international students in Japan” for students in graduate schools, undergraduate schools, and high schools.

The financial support of these data includes not only fellowships but also limited-term employment.

JREC-IN (Japan Research Career Information Network) aims at providing informational support to expand the researchers' career path by collecting and providing information on job openings and job-seeking members. Researchers including postdoctoral researchers can find their employments and/or fellowships in Japanese universities and research institutions.

The data on attendance international conferences are excluded but short stay for researches are included.

The data are divided into 4 research fields described below and then into 2 types of systems (Individual/Institutional).

- The data are divided into 4 research fields and then into 2 types of systems described below. The data are shown in an alphabetical order of the names of organizations providing the financial support in each type of system.

Research fields:

All research fields: incl. fellowships or employments excluding some particular research fields.

Humanities and social sciences: philosophy, art, literature, linguistics, history, human geography, cultural anthropology, law, politics, economics, business administration, sociology, psychology, pedagogics.

Natural sciences and engineering: mathematics, physics, chemistry, engineering.

Biological sciences: biology, bioscience, anthropology, agriculture, medical science, odontology, pharmacology.

Types of systems:

Individual support type: a candidate can apply directly.

Institutional support type: the affiliation of a candidate is limited somewhat or the application must be made through the Japanese host researcher or the affiliating/host institution.

JISTEC expresses the deepest gratitude to The Watanabe Memorial Foundation for the Advancement of Technology for its subsidization.

Opportunities for overseas researchers (from graduate students in doctoral course, postdocs to eminent scientists) to perform researches in Japan

(Revised on January 7, 2010) The data were gathered during October 2008 and July 2009, and the content might be changed. Please refer URL to confirm the detail.

*1: 'Individual' is a individual support type and means that a candidate can apply directly, and 'Institutional' is a institution support type and means that the affiliation of a candidate is limited somewhat or the application must be made through the Japanese host researcher or the affiliating/host institution.

*2: Concerning the date of the application deadline, the date shown is in the recent recruitment. Please confirm the actual deadline.

*3: JREC-IN (Japan Research Career Information Network) aims at providing informational support to expand the researchers' career path by collecting and providing information on job openings and job-seeking members. Researchers including postdoctoral researchers can find their employments and/or fellowships in Japanese universities and research institutions. [<http://jrecin.jst.go.jp/seek/SeekTop?in=1>]

*4: If you notice an error or correction on this data-base, or if you have opinion or comment on this data-base, please report then to JISTEC: Tel: 03-3818-0730, Fax: 03-3818-0750, E-mail: fpfr@jistec.or.jp.
